

Create a Instagram reel / youtube shorts with AI

step 1 : Generate script

visit : <https://www.squibler.io/ai-story-generator> and provide a topic such as adventure or mysterious boy with superpower etc . A short story will be generated hence . Login if needed

Short story :

Once upon a time, there lived a young boy named Alex who could see ghosts. He had always known about his special ability and had learned to live with it. However, things took a turn when a mischievous ghost named Charlie started haunting him. At first, Alex was terrified of Charlie's antics, but soon they became friends. Together, they went on adventures, scaring people and having fun. But one day, Charlie disappeared, leaving Alex all alone. Desperate to find his friend, Alex searched high and low, until he stumbled upon a secret portal to the ghost world. And there he found Charlie, who had been trapped by an evil spirit. With his quick thinking and ghost-seeing abilities, Alex managed to defeat the evil spirit and free Charlie. From that day on, they became an unbeatable duo, exploring the ghost world and helping those in need. Alex's unique ability had brought him an unlikely friend and a world of adventure. And he couldn't be happier.

Step 2 : Generate video visit : <https://www.veed.io/tools/ai-video/text-to-video> and provide the story we created . A small video will be created. Login to download. The video will be created as well as can be edited and exported.
